Short Description	Introduction to Politics is a course that aims to discuss politics as activity with various concepts, systems, and processes. It is aimed to develop students' understanding of basic conceptions and terminology in Political Science as well as it implications in scientific framework. During the learning process, students will be introduced to the basic foundation of philosophies, concepts, theories, methods relatd to the political science as well as various problems in the contemporary politics at the local, national and international levels. At the end, this course will ask students to perform tasks to operationalize their understanding related to current relevant issues.				
Course Themes	<ol style="list-style-type: none"> 1. Submission of lecture rules and an overview of the RPS related to the one-long course material semester. 2. History of Political Science as a Science of Science 3. Philosophical basis of political science studies <ul style="list-style-type: none"> • Philosophy and Political Sciences 				

	<ul style="list-style-type: none"> • Relationship between Political Science and other Social Sciences. <p>4.
